

FastTrack: A Simpler Way to Receive Incentives on Building Controls

What: A streamlined application process for office and retail business customers with 499 kW or less of average summer peak demand to access PG&E ADR Program incentives to upgrade building energy controls.

ADR FastTrack streamlines the ADR application process through the following key elements:

- **Faster processing:** Incentive estimates available within 2 days
- **Pre-approved:** air conditioning and lighting DR strategies
- **Dedicated** ADR program staff support

“The one-time incentives covered virtually all of the project’s costs. With the new system installed, participation in Demand Response events is easy, and we earn additional money for participating.”
– Director of Energy, National Retail Chain

Customer Benefits

- Incentives can cover up to 100% of project cost
- Reduced operating costs
- Better control and visibility into facility operations
- Ongoing payments from DR event participation
- Dedicated ADR support team to ensure projects perform as expected

Qualifying DR Strategies

- Space Cooling
 - Increase thermostat temperature
 - Cycle off air conditioner compressors
 - Cycle off air conditioner fans along with compressors
- Dim lighting

Get Started:

- Step 1 – Apply
- Step 2 – Reserve Incentives
- Step 3 – Install and Commission Projects
- Step 4 – Project Inspection and Load Shed Test
- Step 5 – Receive Incentive Payment (up to 100% of project cost)
- Step 6 – Participation in DR Events

Ongoing Savings: Receive ongoing bill credits from your enrolled DR Program when you continue to shed load automatically for at least three years following project installation.
